

ERGO-EXPRESS™ PTC1 Chair

750 lb Capacity Attendant Driven Motorized Transport Chair

In today's Healthcare institutions, injuries to Healthcare professionals, as a result of patient handling and transport, continues to be one of the biggest issues confronting Hospital administrators across the US. Historically, over 50% of all nursing injuries are related to patient handling and movement costing tens of millions of dollars to facilities annually.

Every hospital department related to patient care transports patients. Nursing staff, transport staff, medical technicians and volunteers are faced with transporting patients multiple times a day with manual wheelchairs.

The Ergo-Express® PTC1 virtually eliminates injuries typically related to manual transport of patients.

All departmental staff can benefit by implementing the routine use of the Ergo-Express® PTC1 versus manual wheelchairs. Size does not matter for the patient or the attending staff.

The Ergo-Express® PTC1 does all the work.

Ergo-Express® PTC1 Motorized Patient Transport Chair

- Power Drive System Virtually Eliminates Ergonomic Issues Related to Manual Transport of Patients on Carpet, Over Thresholds, and Over Ramps
- 750# Capacity Fulfills Up To 95% of All Transport Requirements
- 180° Comfort Padded Rotational Seat and Back Rest for Easy On/Off Patient Transfer and Added Comfort During Transport
