“PHS West, Inc. products are built to the highest standards. We are committed to consistently reviewing and improving the design and durability to continuously meet our customers’ needs. We back this all up with an industry best three year warranty and 24/7-365 technical support.”

-Nowell Colsen, Engineer

**Ergo-Express® Motorized Tug**

The PHS West, Inc. line of Ergo-Express® Motorized Tugs are a safe and compact solution for moving heavy equipment and supplies that are already on a wheeled platform base. Implementing the Ergo-Express® Motorized Tug allows one staff member to safely perform the same task that may currently take multiple trips or staff members.

**Benefits**

PHS West, Inc. offers multiple models of the Ergo-Express® Motorized Tug that allow you to fit the best tool to your specific application and budget. Our tugs have the smallest footprint of any comparable tugger on the market with a towing capacity of up to 5,000 pounds. This allows you to transport heavy, wheeled platform loads without the risk of a push or pull injury.

**Return on Investment**

- Increased efficiency
- Decreased workman’s compensation claims
- Minimized staff turnover
Ergo-Express® Motorized Tug

Hitch Options

Tugger Hitches
- Universal Hitch
- Trailer Ball Hitch
- Pintle Hitch
- Lifting Hitch
- Push Plate Hitch
- Custom (customer specified)

Coupling Hitches

Coupling hitches connect your wheeled products in a “train” so that multiple pieces or carts can be pulled at one time. The product being pulled or connected determines the type of hitch that will function best. PHS West, Inc. has a full compliment of stock coupling hitches that work with the most common carts in the field. Custom designs are available to accommodate your unique requirements upon request.

Ergo-Express® Motorized Tug
