

Ergo-Express® Heavy Duty Lifter

Innovation Designed Around You

**PHS
WEST
INC.**

“At PHS West, Inc. we take pride in developing products that work towards eliminating the possibility of staff injuries. We strive to help you achieve a safer, more productive workplace.”

-Don DeMorett, *Chief Operating Officer*

Safe Material Handling Solutions

Save time and money as you upgrade to accommodate increased production.

Ergo-Express® Heavy Duty Lifter

Our Ergo-Express® Lifters are a line of material handling equipment that offer huge advantages over stationary or manual systems. Lifters are useful for any industry where lifting, moving, handling and manipulation of loads takes place.

Unlike other lifting products such as lift carts, mobile lifting trolleys, hand-cranked carts, pump carts, etc. the lifters offer distinct advantages including ease of operation and unsurpassed load handling.

The lifters can be used in most production areas. Save time and money as you upgrade to accommodate increased production. Eliminate cost associated with moving fixed or automated equipment. Implement the lifters today without expensive setup and training for immediate reduction of injury risks and related cost.

Why Lifters?

- Back injuries cost the industry over \$210 billion yearly, with over 50% of all back problems a direct result of lifting.
- Corporations are implementing maximum lift limits, ranging from 25-40LB.
- High-load lifts lead to early wear-and-tear symptoms in the muscles, joints and discs.
- Lifting from and to low heights causes great strain on the back and knees.
- Lifting from and to high heights causes great strain on the shoulders and neck.

Ergo Express® Heavy Duty Lifter

Features

- Anodized Aluminum/Steel (Stainless Steel) Construction
- Modular Design
- Large Caster Wheels
- Central Brake System
- Detachable Remote Control Pendant
- Multiple Lift Speeds
- Completely Enclosed, Single Lift-Mast with Electric Lift Screw
- Adjustable Load Capacity
- Detachable Power Pack for Off-Board Charging

Ergo Express® Heavy Duty Lifter

Benefits

- Light weight and mobile for easy operation in narrow spaces.
- Easy movement with full load in all directions with casters.
- Foot operated, central brake on rear wheels – accessible from all sides.
- Precise stop of lift function with use of slow speed feature.
- Single Column mast provides the operator a clear view for safe operation.
- Adjustable handlebar allows each individual to obtain a preferred work position, thus making it “ergonomically correct”.
