INC.**

"It is extremely rewarding working for a company that is dedicated to making a positive impact in workplace safety. This common goal shared by our entire team further contributes to the family atmosphere within our office."

-Zach Lanars, *Marketing Assistant*

INNOVATION
for
DATA CENTER
maintenance

Safe Transportation Options

Our material handling solutions provide a compact solution for moving data center specific materials, equipment and supplies.

Data Center Solutions

Ergo-Express® Motorized Service Carts with Lifters are a safe and compact solution for moving supplies required for maintenance within data centers. With a motorized service cart, one staff member can move all the necessary equipment and tools that previously took multiple staff members or trips. Hitch a lifter to your cart to ensure you have the ergonomically correct height and positioning for adjusting components. Rather than the cumbersome task of manually transporting all of your equipment, now everything you need is located within one power drive system.

Benefits

- Eliminate the risk of push/pull injury that comes with transporting heavy tools and equipment throughout your facility.
- Use of lifter allows for working on individual components at an ergonomic height. Eliminate the strain on muscles, joints, and discs associated with high/low heights and high load lifts.
- Increase efficiency by allowing any one staff member to perform a task that previously took multiple staff members or trips.

PHS West, Inc. Power Drive Solutions

Customizable Options

Our power drive systems are built with a level of modularity and customization that is unsurpassed by competitors. At PHS West, Inc. we take the definition of ergonomics literally in everything we do by fitting the tool to the person and not trying to make the person fit the tool.

- **Carts:** The multiple models of motorized carts will allow you to fit the best tool to your specific application and budget. A wide variety of containment, securement, and shelving options are available. Multiple drawer size combinations are available in our “gang” locking drawer cabinets.
- **Lifters:** Our lifters are completely modular in design; no longer will you need to make a cookie cutter product work for your application.

Featherweight® Motorized Service Carts

Features

The array of Featherweight® Motorized Carts offer a safe and efficient way to move heavy equipment and supplies. Our ergonomic power drive solution for the transport of materials allows staff the ability to transport larger loads in fewer trips and reduces potential staff injury.

Lifters

Features

Our lifters are a line of material handling equipment that offer huge advantages over stationary or manual systems. Lifters streamline operations taking place in a data center setting allowing one person to do the task that previously took two to three. With precise height and alignment adjustments, adjust necessary IT equipment up to 600LB in racks with ease. Our lifters are the lightest lifter on the market with the smallest available footprint.
