

ERGO-EXPRESS®

Motorized Server Rack Tug

Bolster efficiency related to the transport of heavy server equipment.

Our Mission

PHS West is a relationship focused organization providing innovative products for a safe and efficient workplace.

For more than 20 years, we have taken great pride in what we manufacture. We strive to provide products and services beyond our customers' expectations each and every day; our hallmark technical support after the sale is yet another way we deliver on this goal.

Laurie Schneider
QUALITY MANAGER

Motorized Server Rack Tug

The Ergo-Express® Motorized Server Rack Tug has changed the way data center teams manage rack movement within their facilities. Moving server racks previously required multiple team members to complete a single rack movement. With our Motorized Server Rack Tug, a single team member can safely and effectively transport a server rack to its destination. This allows data center teams to complete rack moving operations faster and with fewer risks.

FEATURES

With options for universal and customized hitch plates, the Server Rack Tug can haul various rack configurations up to 5,000 pounds with no modification to the racks themselves. Hitching and unhitching from server racks is as simple as securing a pair of ratchet straps. The intuitive user interface is built for ease of use and quick access to safety features.

All PHS West products are backed by our 24/7 technical support guarantee meaning you can call us anytime for product support. With a three-year warranty on parts, optional extended warranty, and service package options, you can tailor your level of product support to meet your needs.

Ergo-Express® Motorized Server Rack Tugs

BENEFITS

Designed as a turnkey product, the Server Rack Tug drastically reduces the number of man-hours needed to complete rack moving operations immediately upon implementation. Not only does it allow a single operator to move a server rack, they can also move the rack faster thanks to the tugs power drive system.

Furthermore, the use of a Server Rack Tug mitigates the potential for overexertion injuries when moving server racks. Safer, more efficient rack transportation also reduces burnout and staff turnover.

“

TESTIMONIALS

“The Ergo-Express® Motorized Server Rack Tug is one of the best investments our organization has ever made. The tug is an integral piece in our day-to-day operations; I do not know how we managed before it came about.”

-EMPLOYEE HEALTH AND SAFETY MANAGER

“Ergo-Express® Motorized Server Rack Tugs have been essential to our team’s functionality. This product has allowed us to increase output without having to increase our staff. We will never operate without one again!”

-DATA CENTER LOGISTICS MANAGER

ADDITIONAL FEATURES

Every aspect of the Motorized Server Rack Tug has been designed to bolster safety and ease of use.

SPRING-LOADED STRAPS

Designed for secure transport and easy hitching and unhitching.

RUNNING LIGHTS

Increase visibility and awareness in dimly lit surroundings.

AUDIBLE HORN BUTTON

Announce the presence of the tug when operating in low visibility areas or turning blind corners.
