### Server Rack Ramp

The Ergo-Express® Server Rack Ramp provides a stable, secure base for unloading server racks from a pallet. Working in tandem with our Ergo-Express® Motorized Server Rack Tug, this all-in-one system overcomes the challenges of unloading palletized server racks.

### BENEFITS

Our patent pending design offers many unique benefits. With safety as the utmost priority, use of the Server Rack Ramp greatly mitigates the risk of injury. Eliminate the potential for tilt or fall hazards, as well as push or pull injuries, associated with manually maneuvering a server rack.

Additionally, bolster efficiency by removing the need for multiple staff members to unload a server rack. The ease-of-use and requirement for only one operator provide a drastic reduction in the time it takes to complete unloading.

# Ergo-Express® Server Rack Ramp

## EASE-OF-USE

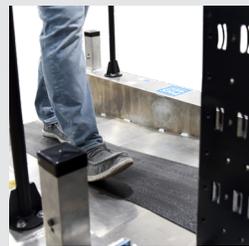

Several features of the Server Rack Ramp combine to provide maximum ease-of-use and efficiency.

### FEATURES

#### Optimal Maneuverability

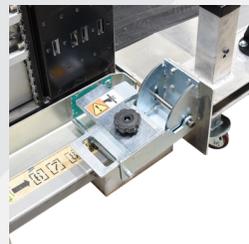

Position the ramp with ease due to compact length and full swivel casters.

### FEATURES

#### Self-Levelling

Save the time and effort previously spent on manual height adjustment.

### FEATURES

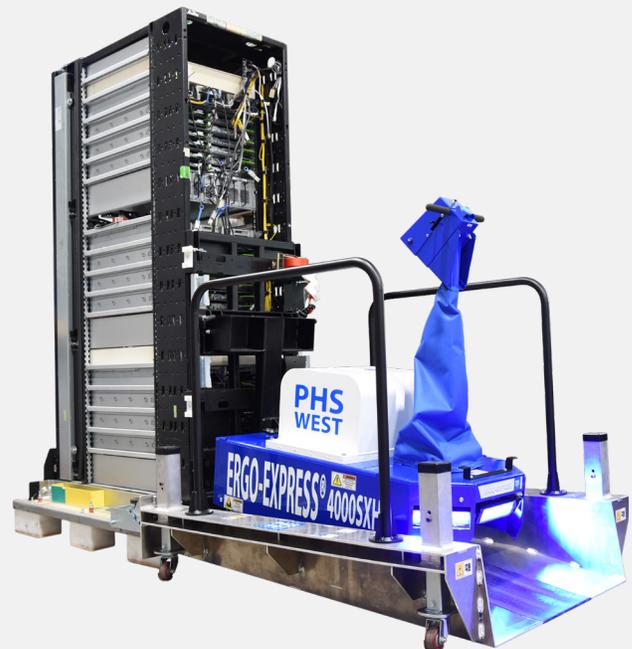

#### Secure Latches

Ensuring stability minimizes injury risk and time spent re-connecting.

## ERGO-EXPRESS® MOTORIZED SERVER RACK TUG

The Server Rack Ramp is specifically designed for seamless compatibility with the Motorized Server Rack Tug. Benefits of this pairing include:

- Mitigate injury risk by use of power drive
- Bolster stability to eliminate tilt hazard
- Increase output with less staff required
- Significantly reduce time spent unloading racks
- Put an end to congested loading docks
