

ERGO-EXPRESS® Server Rack Ramp

Safely and efficiently load and unload heavy server racks from pallets.

Our Mission

PHS West is a relationship focused organization providing innovative products for a safe and efficient workplace.

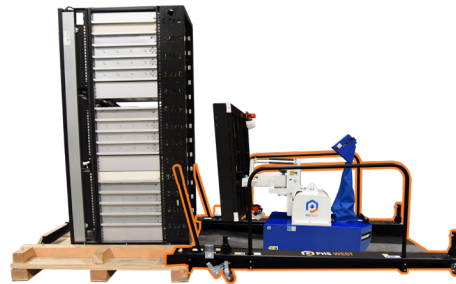

The biggest reason I enjoy working at PHS West is the people. The established family culture creates a stress-free environment that support each team member with the necessary tools to succeed.

Server Rack Ramp

The Ergo-Express® Server Rack Ramp provides a stable, secure base for loading and unloading server racks from shipping pallets. Paired with our Ergo-Express® Motorized Server Rack Tug, this all-in-one system addresses the logistical challenges and potential risks employees face in the rapidly evolving world of data centers.

BENEFITS

As data centers continue to grow, so does the demand for faster server rack integration and scalable logistics solutions. By providing a stable and secure base for loading and offloading fully populated cabinets, our Server Rack Ramp mitigates hazards and bottlenecks that occur during a rack integration and transport processes.

When paired with our Motorized Server Rack Tug, a single operator can safely manage rack integration, relocation, and decommissioning activities with ease. Field tested and trusted by some of the biggest names in information technology, the Server Rack Ramp has proven its place as an invaluable asset in the modern data center landscape.

Ergo-Express® Server Rack Ramp

A SOLUTION THAT WORKS

Several features of the Server Rack Ramp combine to provide maximum ease-of-use and efficiency.

Easy to Maneuver

Robust swivel casters allow our Server Rack Ramp to glide easily from one job to the next and make alignment a breeze.

Levels Automatically

Once aligned, our innovative latching system connects with pallet bases and self-levels for a seamless fit free of bumps or gaps.

Mitigates Hazards

When used with a Server Rack Tug, our ramp mitigates tipping hazards and other risks to both operators and sensitive hardware.

MOTORIZED SERVER RACK TUG

The Server Rack Ramp is designed for seamless compatibility with the Ergo-Express® Motorized Server Rack Tug. The pairing provides integral benefits to the safety and efficiency of server rack integration and transport.

- Mitigate injury risk by use of power drive
- Bolster stability and eliminate tilt hazard
- Increase output with less staff required
- Significant reduction in the amount of time spent unloading racks
- Put an end to congested loading docks
